Figure 1 is a schematic diagram of the experimental setup. It shows a subject in a supine position, looking at a video screen. On the screen, there are two points: a starting point (VL) and a target (VT). The distance between these two points is labeled as 20mm. The distance from the subject's eye to the screen is labeled as 80mm. The diagram illustrates the geometry of the task, where the subject must move a hand from the starting point to the target while viewing the screen.
